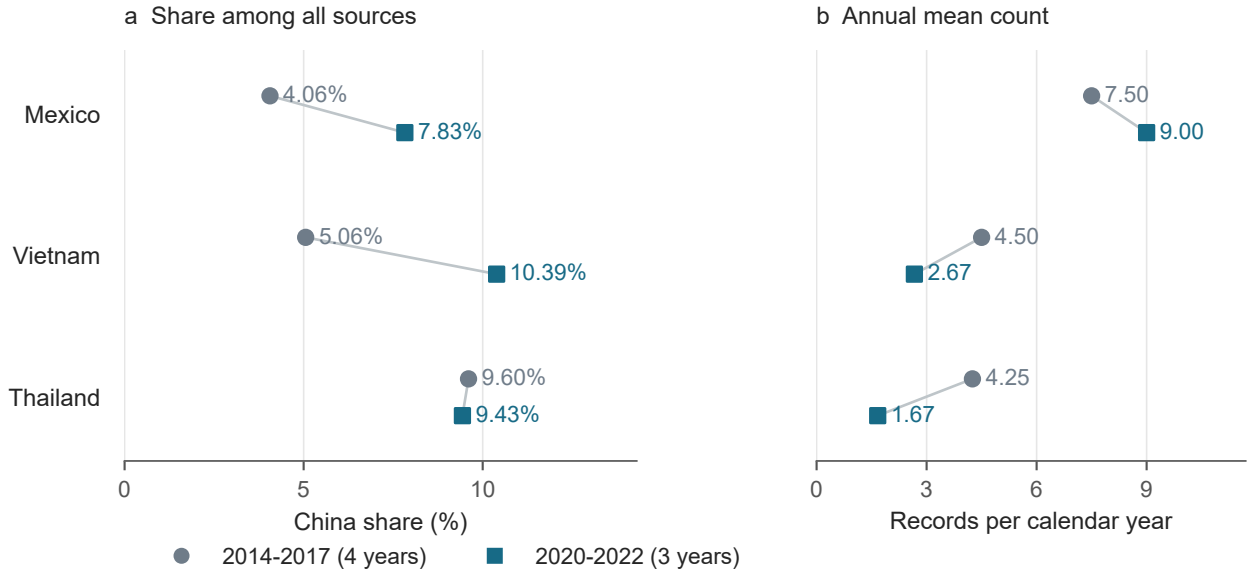
A higher China share need not mean more annual records

Manufacturing records sourced from China | The two panels use the same underlying records



China / all-source counts, pre → post: Mexico 30/739 → 27/345; Vietnam 18/356 → 8/77; Thailand 17/177 → 5/53. Annual means divide China counts by 4 and 3 years, respectively.

Shares are descriptive; Thailand's share change is window-sensitive. Records are not verified unique projects.
